

Pure Farming Technical Bulletin

Number: TB-DISCO-01

Issued: 18.09.2024

Summary

The Discovery UI has been modernised and simplified to allow for additional use cases. This includes the grouping of “recipients” into relevant organisations as well as the provision for displaying of various levels of reports for the users of Discovery.

Affected Parties

Any customers using Discovery will be affected as this will change their experience. If you are not using Discovery, then you will not be affected. This does not affect any APIs that you may be using, your data, or streaming APIs.

Release Timeline

Test: Now.

Production: **Production availability on 25th September 2024** (we will notify you if there is a change to this release date).

Downtime Window: 09.00 – 11.00 NZST

Changes

- Holdings are now sorted by Organisation, useful for large farming businesses with several holdings/farms.
- Privilege controls for two user types; Administrators can create and edit requests, Full access users can send requests.
- You now have three options to send data requests; via Pure Farming, copy to clipboard, or via Mail Merge.
- Terms documents can now be uploaded by the administrator.
- Edit Holdings and Organisation details.
- Dashboards view per Holding and summarised at the Organisation level, currently displaying emissions data for applicable customers.

Mitigation

This update to Discovery retains all existing functionality in Discovery, but some things may have moved or changed location. Please see the Changes section for more information.
